PROJECT EXPERIENCE

Software Developer - SILTIUM

October 2022 - September 2023

- Development of a multi-tenant administrative system.
 - Role: Frontend Developer using NextJs, for layout and connection to endpoints.
- Development of an administration system for a wholesale distributor.
 - Role: FullStack developer using AngularJs for frontend and .Net for backend development.

ReactJs, NodeJs, ExpressJs y MongoDB Project - Rolling Code

June 2022 - July 2022

Third team project for the development of a website for the publication and adoption of lost pets. We worked with ReactJs and Bootstrap for the frontend and for the backend we used NodeJs with ExpressJs. MongoDB was used as a non-relational database.

Vanilla JavaScript Project - Rolling Code

March 2022 - April 2022

Second team project, for the development of a website for selling video games. We worked with Vanilla JavaScript and implemented scrum methodology and use of git.

Html, Cs & Bootstrap Project - Rolling Code

September 2021 - November 2021

First team project for the realization of the layout of a web site for PC components sales.

ABOUT ME

I am a passionate frontend developer with experience in ReactJS and Angular, which allows me to turn creative designs into interactive and functional experiences.

I enjoy working in teams, having successfully achieved shared goals while cultivating strong interpersonal relationships.

My enthusiasm for professional growth and the pursuit of new challenges drive me to keep expanding my skills in the frontend development universe.
